Overview presentation on ADOLESCENTS & HIV.

Interfaith UNGA side session: The role of faith communities in supporting adolescent's prevention, treatment, care, and leadership in the HIV response. 23/9/21, NY

Presentation outline

1. Overview
2. Adolescent HIV epidemiology
3. Adolescent HIV response
4. Takeaway messages and call to action

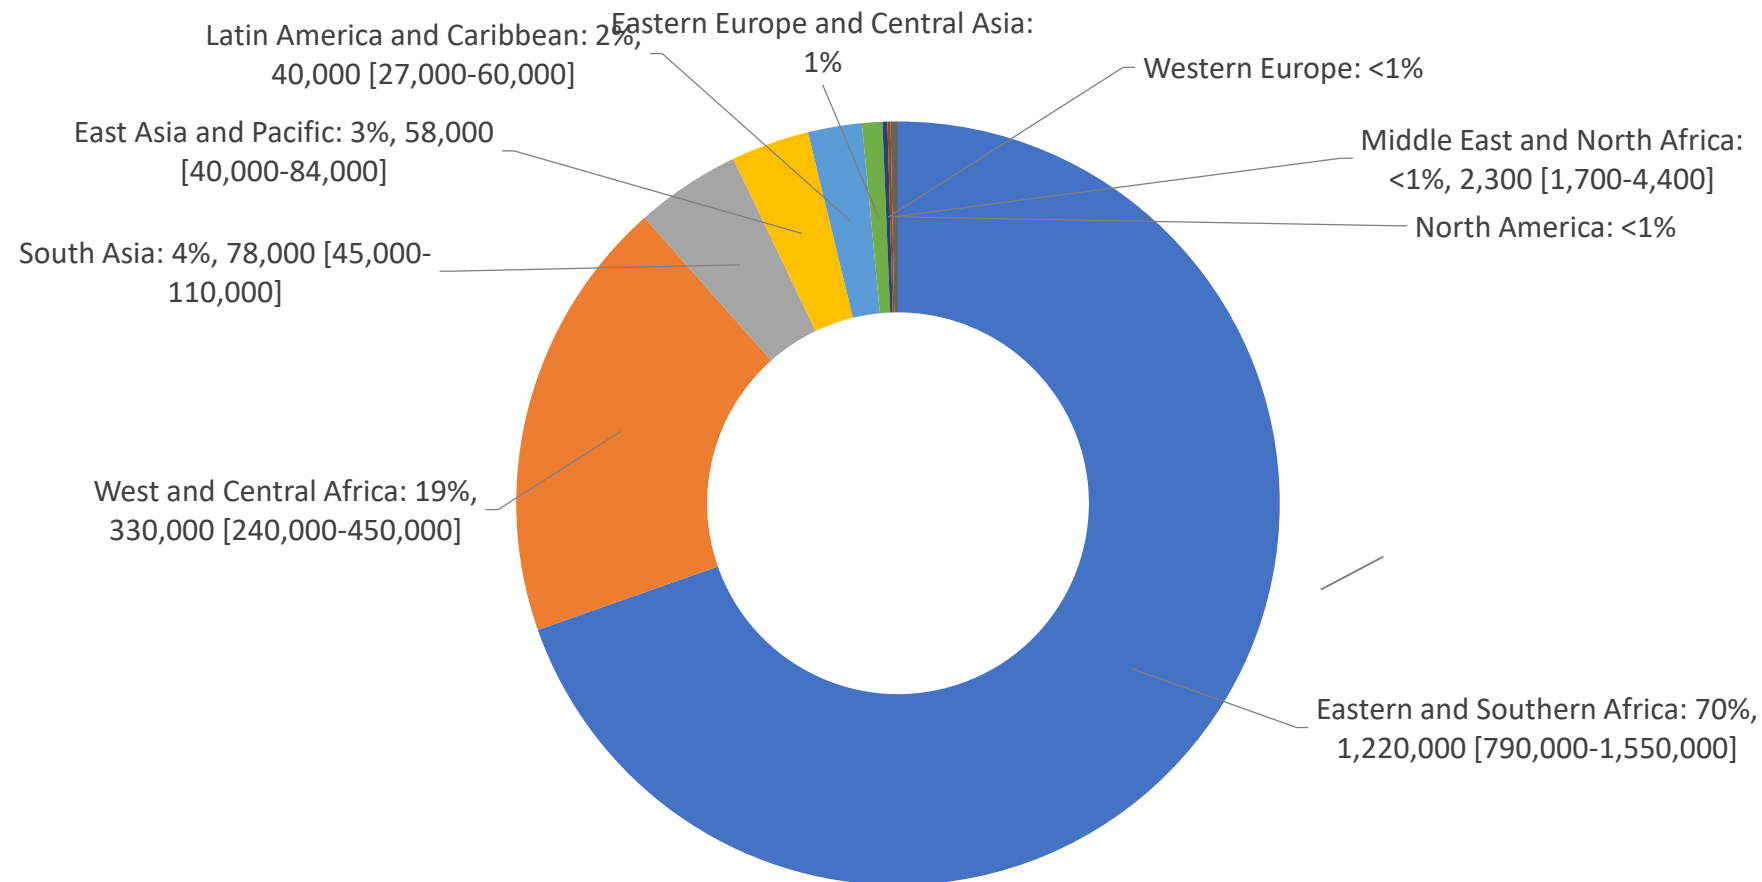

Setting the Scene

Indicator	Adolescents 10-19	Girls 10-19	Boys 10-19
Estimated number of adolescents living with HIV	1,750,000 (1,160,000 - 2,300,000)	1,000,000 (590,000 - 1,370,000)	750,000 (550,000 - 960,000)
Estimated number of adolescents newly infected with HIV	160,000 (44,000 - 310,000)	120,000 (24,000 - 230,000)	36,000 (6,400 - 95,000)
Estimated number of adolescents dying of AIDS-related causes	32,000 (23,000 - 46,000)	16,000 (11,000 - 24,000)	16,000 (12,000 - 23,000)

AFRICA**

A review of

Transition Pathways Out of Pediatric Care and Associated HIV Outcomes for Adolescents Living With HIV in South Africa

Roxanna Haghghat, MSc,a Elona Toska, DPhil, MSc,a,b,c Lucie Cluver, DPhil, MSc,a,d Laurie Gulaid, MSPH,e Daniella Mark, PhD, MSocSc,f,g and Anurita Bains, MMh

- Need for acceleration - HIV testing access remains low and only half of the 1.75M ALHIV are accessing treatment, needing a paradigm shift in service approaches:
 - Innovations - self testing, digital solutions, peer led and peer support programmes,
 - Care plus including parenting and social protection
 - Transitioning children growing up with HIV to adult care
- Coverage much lower in WCA countries and needs prioritized attention
- Refocus prevention - No. of new infections have dropped by 34% since 2010; but below the 75% target for 2020

Thank you
